THE 60-SECOND BRIEF

Project Demand

Give sales the context before the first buyer call.

For whom

Developers and project sales teams with a specific scheme on sale.

When to use it

Enquiries arrive, but sales has to discover the source, unit preference or purpose of the call from scratch.

Tool inside

A one-page handoff record and a review of five current enquiries.

Your result

Identify the field that is repeatedly missing before the first conversation and assign an owner.

DECISION SCENE · ILLUSTRATIVE

Three enquiries need three different calls

One person responds to a project visual and asks for an overview. Another downloads the brochure for a three-bedroom unit. A third asks to view unit B12. If all three arrive as identical leads, sales must rediscover the reason for contact.

Decision for the team

Choose the call objective first: explain the scheme, clarify brochure questions or prepare a viewing. The campaign message, pictured unit and enquiry type need to travel together.

WHERE THE JOURNEY BREAKS

Four transitions. Four visible signals.

01 Presentation → enquiry

Warning sign: The visual and form describe different units.

02 Enquiry → triage

Warning sign: A brochure request and viewing request get the same status.

03 Triage → follow-up

Warning sign: Timing is known but no follow-up date is set.

04 Follow-up → handoff

Warning sign: Sales receives a name and number, with no context.

DECISION RULE

What belongs in the first-call brief?

Needed before the call

Enquiry type, source and trigger, unit preference or 'open', outstanding question, owner and next scheduled action.

Voluntary and relevant

Intended use, timing and broad price fit as self-assessments. 'Not provided' is a valid answer.

Leave out at this stage

Income evidence, detailed assets, family circumstances and other sensitive material. Specialist checks belong later in a suitable process.

WORKSHEET

Project Demand

Fill in only what the next step needs

Source and trigger

Enquiry type: project / brochure / viewing

Preferred unit or property type

Intended use (optional)

Timing (optional)

Price fit: suitable / open / not provided

Outstanding questions

Responsible person

Next action and date

COMPLETED EXAMPLE · ILLUSTRATIVE

Project Demand

Source and trigger

Project page · garden apartment visual

Enquiry type: project / brochure / viewing

Brochure request

Preferred unit or property type

Three-bedroom garden apartment; unit open

Intended use (optional)

Own use

Timing (optional)

Would like to view next month

Price fit: suitable / open / not provided

Price range broadly suitable (self-assessed)

Outstanding questions

Is step-free access planned?

Responsible person

Project sales · team member A

Next action and date

Send plan; call on 15 Oct at 14:00

QUICK EXERCISE

Five enquiries, one recurring gap

Anonymise five current enquiries. Mark each field present, unclear or unnecessary. Count only gaps that matter to the first call. If the same field is absent in at least three cases, change that collection step first.

Evidence from five recent cases

SET PRIORITIES

A scorecard without false precision

Yes = 2 · Partly = 1 · No = 0. Add all five answers (0–10 points).

1. Is the enquiry type clear?

□ 2 □ 1 □ 0

2. Are source and specific trigger recorded?

□ 2 □ 1 □ 0

3. Is the unit preference known or explicitly open?

□ 2 □ 1 □ 0

4. Are questions and timing visible for the call?

□ 2 □ 1 □ 0

5. Is there an owner and a scheduled next action?

□ 2 □ 1 □ 0

0–3: fix the missing handoff first

4–7: test one bottleneck and measure again

8–10: keep the process; inspect exceptions

ONE SEVEN-DAY IMPROVEMENT

Improve one question. Then check.

Day 1

Sales selects five anonymised enquiries.

Day 2

Marketing matches each trigger with the visual and brochure.

Days 3–4

Sales obtains missing information only where it changes the next action.

Days 5–7

One owner uses the record on new enquiries and checks call preparation.

Visible output: five marked records, one named gap and one person responsible for fixing it.

DECISION SCENE · ILLUSTRATIVE

From campaign image to sales call

Illustrative: A campaign features a garden apartment. Its project page links to the matching unit and brochure. The enquiry notes own use and a viewing next month. The team resolves an access question, books a call and passes the record to the existing sales team. The conversation is better prepared; a sale is not assumed.

For your team

Identify the field that is repeatedly missing before the first conversation and assign an owner.

FOR YOUR NEXT TEAM MEETING

Start with three questions.

01

Separate general project interest, brochure requests and viewing requests.

02

Pass the trigger, open question and scheduled action together.

03

Collect optional details sparingly; record 'open' instead of guessing.

NEXT STEP

Request a 30-minute Project Check

Bring a project page or anonymised enquiry and your current handoff route. We will examine one transition and give you a prioritised next action. No sales result is promised.

Your ten-minute result

The worksheet works without NovaLure. A Project Check is an optional way to review the full journey.

Request a 30-minute Project Check

For internal use. Anonymise personal examples before sharing. This is not legal, tax or financial advice.
